# Craig M. Buchek

314-374-5780 craig@boochtek.com

832 Westbrooke Meadows Ct. Ballwin, MO 63021

### **Summary**

• Software developer with 20 years of IT experience. Experienced Ruby on Rails web developer. Strong GNU/Linux system administration skills. Strong knowledge of web technologies and network protocols.

### **Highlights**

- Helped several teams improve their processes and technical skills.
- Built web sites in Ruby on Rails for several different companies.
- Mentored developers in Agile methodologies and Java programming, in order to bring developer jobs back to the USA.
- Implemented method of automatically configuring cable modems for a large Internet Service Provider, with approximately 20,000 cable modem customers per site.
- Led and managed a small team to develop GNU/Linux training manuals.
- Very active member of local Ruby and GNU/Linux communities.
- Co-host of This Agile Life podcast.

### **Technical Expertise**

- **Programming languages**: Ruby, JavaScript, UNIX shell, Python, Java, PHP, C, C++
- Web development: HTML/CSS, JavaScript/AJAX, Ruby on Rails, jQuery, XML/XSLT
- **Development practices**: Agile methodologies (XP, Kanban, Lean, Scrum), test-driven development (TDD), behavior-driven development (BDD), pair programming, continuous integration, source control, configuration management (Ansible), deployment automation
- Development tools: Git, RSpec, Capybara, Cucumber, Selenium, Capistrano
- Operating systems: GNU/Linux (Debian, Ubuntu, Red Hat), Mac OS X, Windows
- Network services: Web servers (Apache, Nginx), Web proxies (HAProxy, Squid), Email (Postfix), file services (Windows, Novell, Samba, NFS), DNS (BIND), LDAP (OpenLDAP)
- **Technical communication**: Written procedures, live presentations, training, development of training materials, technical writing, technical editing

### **Training and Conferences**

- Pragmatic Programmers Advanced Rails Training 2007
- RubyConf 2014 (presenter), 2015 (presenter)
- RailsConf 2007, 2008, 2010, 2014, 2015 (presenter)
- Midwest Ruby Conference 2011
- Windy City Rails 2011, 2015
- Madison+ Ruby 2015 (presenter)
- Strange Loop 2011, 2012, 2013, 2015
  - Hadoop training 2012

• OSCON (Open Source Conference) - 2003

## **Professional Experience**

#### Web Developer at BoochTek, LLC (2006.12 - present)

- Provided consulting services to companies implementing and upgrading web sites.
- Provided guidance on technical and process improvements.
- Designed and implemented web applications for several companies.
  - Deployment and management of Cloud Foundry clusters. (Java)
  - Social networking hub, integrated with other social networking sites. (Rails)
  - Patient portal for hospitals. (Node)
  - Management system to track tutoring sessions. (Rails)
  - Conversion of Access application for aggregating feedback forms. (Rails)
  - Online sales quote system. (Rails)
  - Web forms for non-profit companies. (PHP)
- Provided bug fixes and feature updates to existing web applications.
  - Reduced code size and complexity to simplify on-going site maintenance.
- Developed bug tracking and feature request procedures and sites for customers.
- Developed source code revision control and deployment best practices to easily add features to production sites, with ability to back out changes quickly if necessary.

#### **Sr. Software Developer** at Liaison International (2013.09 - 2014.11)

- Worked to improve a large complex Ruby on Rails application.
  - Increased test coverage.
  - Reduced technical debt.
  - Re-architected several components.
- Helped transform a team to employ Agile practices to increase performance.
  - Implemented retrospectives, pair programming, TDD, refactoring, continuous integration, code reviews.
  - Mentored them to improve their Ruby skills.

#### **Cloud Engineer** at Express Scripts (2012.10 - 2013.09)

- Worked on a team building an internal cloud infrastructure.
  - Automated deployment of Java applications to cloud servers.
- Developed web interface to view information about web applications deployed to the cloud. (Python)
- Helped existing projects modify their practices to deploy their applications to the cloud.
- Acted as liaison to coordinate with other groups to push the company toward the strategic goal of utilizing the cloud infrastructure.

#### **Sr. Software Developer** at Asynchrony Solutions (2010.10 - 2012.10)

- Designed, implemented, and deployed large-scale web applications for several companies.
  - Social networking and data gathering site for patients with type 1 diabetes. (Rails)
    - Provisioned load-balanced servers for 200,000 concurrent users.
    - Assisted with system administration and configuration management tasks.
  - Asset management system for a large company (12 million digital assets). (Java)
  - Developed, maintained, and documented APIs for several mobile client applications. (Rails)
- Practiced Agile/Lean methodologies: pair programming, Kanban, acceptance testing, TDD, BDD, refactoring, continuous integration, retrospectives.
- Traveled to and consulted at a large corporation (7000 employees) to teach their developers how to implement Agile practices.
  - Implemented pair programming, Kanban, TDD, refactoring, continuous integration.

- Mentored them to improve their Java skills.
- Installed and used Cucumber-JVM, Selenium, Jenkins, JUnit, Eclipse.
- Adopted architectural practices more amenable to large-scale use with Rails.
- Utilized cutting-edge technologies with Ruby on Rails:
  - MongoDB/Mongoid, ElasticSearch/Tire, Devise, HAML, SASS, Spine, CoffeeScript, Capybara, Cucumber, RSpec, Jasmine

### **Community Involvement**

- Co-host of This Agile Life podcast
- Active member of St. Louis Ruby Users Group
- Active member of St. Louis GNU/Linux Users Group
  - o Chairman, 2001 2014
- Active member of St. Louis UNIX Users Group
  - Board of Directors, 2001 2004, 2007 2013
  - Secretary, 2004 2015
- Mentor for Roy Clay Sr. Tech Impact program
  - Web design for underprivileged youth
- Presentations on various technical topics at various venues
  - Ruby, Ruby on Rails
  - jQuery, JavaScript, AJAX
  - HTML, CSS, XML, HTTP
  - Open Source, licensing

### **Education**

• Rose-Hulman Institute of Technology (Terre Haute, IN). Computer Science major.
